

Why Code Integrity Solutions?

Code Integrity Solutions is a consultancy focused on static analysis and build engineering tools. Code Integrity Solutions provides a full range of value added services to help most any organization meet their quality and security goals. Many companies quickly realize that their expertise is focused on building great capabilities for their product line and NOT on static analysis. We see time and time again, organizations putting a “free person” on the project only to have the project fail 3-6 months later.

Whether your goal is to get the most from your investment or to minimize risk of failure, Code Integrity Solutions can help you. Here are just some of the reasons why companies use Code Integrity Solutions.

Why?	Description
<p>Best Practices Expertise <i>because building expert assistance internally is expensive and not your core competence</i></p>	<ul style="list-style-type: none"> • Call it best practices, expertise, best of breed, subject matter expertise (SME) – Code Integrity Solutions gives you <i>access</i> to the deep skills and experience that you would be impossible to source internally • Our team is always trained on the latest and greatest. As official partners to Coverity, Klocwork and Electric Cloud, we are 100% dedicated to these solutions and understand how to maximize them for your needs. We work with the vendor as a team to ensure your success. • We have deep experience helping companies achieve best practices (isn't that what you expect when you purchased the tool) even in the most complex technical and organizational environments
<p>Catalyst for Change Management <i>because 'change is hard' and we've helped many others in a similar situation succeed</i></p>	<ul style="list-style-type: none"> • Our consulting team is comprised with senior engineers, architects and managers who are masters of <i>change management</i>. They have worked with many small and large organizations to drive <i>sustainable change</i> -- providing not just technical assistance, but also help with increasing developer adoption and increasing management visibility • Our team can work with you every step of the way, <i>providing support and leadership to design, architect, deploy, rollout and maintain</i> a best practices solution
<p>Cost Effective <i>because you get the help you need only when you need it</i></p>	<ul style="list-style-type: none"> • The fully loaded cost of hiring, training and assimilating a new employee can be high and very hard on the budget • We've worked on projects from 1 day to more than a year. With Code Integrity Solutions, you have the flexibility to have a real expert on hand at your convenience. We also offer part-time and remote options to fit your work process and budget • We can help you at every step of the lifecycle, from design, tuning to deployment to ongoing maintenance
<p>Independent Viewpoint <i>so you can fully leverage the experience of others</i></p>	<ul style="list-style-type: none"> • “Reinventing the wheel” is expensive – and you may never achieve the benefits that you could have had. Some organizations take several years of hard investment to achieve the expert level of knowledge that you could get tomorrow in working with the right partner. • Code Integrity Solutions has vast experience working with many different-sized companies in a variety of industries. We impart the experience and know-how from all of these engagements for your environment
